Sylvan Course Descriptions

Main:

2150 NE Studio Rd. #10
Bend, OR 97701

NWX:

2754 NW Crossing Dr. #101
Bend, OR 97703

Personalized Tutoring

(Grades PreK-College)

Sylvan's personal approach in math, reading, writing, homework support and study skills can set your child up for success throughout the school year and for life. Our hours are flexible and programs are developed based on your personal needs and goals. For enrichment or remediation, allow our expert, licensed teachers to help your child grasp concepts in a supportive and focused environment.

Academic Coaching*

(Grades 6-12)

For students who need more practice, an extra boost, an added challenge, or help with homework, tests or time management and organization. This class allows students to thrive based on consistent weekly support and personalized coaching from expert teachers. You choose the days and times your child attends with options for 2, 3 or 4 days a week.

Robotics Camps

(Grades 1-6)

In these hands-on camps, students use LEGO® technology to design, build and program a robot to come alive! Based on creative themes and design challenges, students use their problem-solving skills and imagination as they explore the technological world around them.

Hybrid Course for Credit*

(Grades 9-12)

Students can take a half credit (~18 weeks) or full credit (~36 weeks) course through a blend of asynchronous and in-person instruction. Students have the option of moving through these courses at their own pace, so they can wrap up a credit during summer months. Powered by our partner, Columbia Learning, students are expected to work on material at least 5 hours per week; 1-2 of those hours each week would be with a dedicated Sylvan support teacher. Over 100 course options available including AP and honors!

SAT or ACT Prep

(Grades 10-12)

We give teens the skills, strategies and practice needed to boost his/her scores on college entrance exams. Personalized strategic plans help students maximize their study time with our expert teachers.

**All Monthly membership classes are month-to-month subscriptions with no contracts required. Excused absences must be used within each calendar week.*

Engineering Camps

(Grades 1-6)

Use your engineering brain while planning, designing, building and testing anything from simple machines to complex structures! With new design challenges in every class, students discover the mechanics behind the machines we use every day.

Flexible Course for Credit*

(Grades 8-12)

Ensure success and understanding with our accredited courses. Courses are individualized to each student's learning style and taught at the student's pace.
Algebra 1 & 2
Advanced Algebra 2
Geometry
Functions, Stats, and Trig
Pre Calculus & Calculus
College Prep Studies
Creative Writing
Literature and Composition 9-12
Advanced Study Skills
Electives, and more!

ASVAB & GED Prep

(Grades 11-Adult)

An individualized approach of content review and test-taking strategies to prepare and build confidence for these critical basic skills tests. With a focus on math and reading topics, we can create a flexible schedule for success on these tests!

STEM Bonanza Camps

(Grades 1-6)

A combination of Robotics and Engineering makes our STEM Bonanza Camp a true hit. Students will explore various aspects of the STEM worlds as they work through designing, building and coding challenges. With new builds in each class there is never a dull moment!
