AT SYLVAN, WE BELIEVE:

## EDUCATION IS EVERYTHING

A child's future depends on a solid education and a love of learning. We teach your child how to learn, so he or she builds the confidence and skills to be successful in school and beyond.

### *Learning should be personal*

No two students are exactly alike. That's why we offer diverse programs and a personal approach to make sure your child is learning in a way that works best for him or her – at the right pace, in the right style, with the right skills.

## GREAT TEACHERS

### *Inspire*

Our teachers don't just teach. They get to know your child, providing the positive reinforcement that leads to success. Our educators turn frustration into confidence, Bs into As, and dreamers into life-long achievers.

## TECHNOLOGY

### *Accelerates* LEARNING

Technology is changing the world, enhancing the way we live and learn. But technology doesn't teach students, teachers do. We blend great teaching with great technology to get the best out of your child.

## RESULTS MATTER

We're committed to ensuring that every Sylvan student advances in our programs. We have over 35 years of great results, millions of successful students and counting.
