

## Ensuring the Safety of Our Students

At Sylvan, your child can get consistent in-person learning support. Our team of education experts are here to provide that friendly and caring personal touch in a safe and supervised learning environment.

Your child's health and safety are our top priority, so we are following all local mandated guidelines and have put into practice the recommended social distancing, frequent handwashing and repeated disinfecting of workspaces protocols.

The protocols we have in place not only meet, but exceed recommended standards.

### **Here are some of the safeguards you can expect to see:**

- Following health and safety guidelines, all students and staff will have a daily temperature check upon arrival and will be required to wear masks at all times.
- We also require all those who enter our center (visitors, customers, etc.) to wear a mask and to keep it on the entirety of the time they are in the center.
- There are sanitizing stations throughout the center, frequent handwashing and repeated disinfecting of workspaces.

Rest assured, your child can interact with teachers (and peers) in a safe way. (Safe and socializing? It's a win-win!)

### **Have your child keep learning from the best in personalized education.**

Kids have always loved coming to Sylvan. They'll love getting the caring and personalized support even more now.
